***Important! MP3 versions may change kit's pieces/tracks lengths and quality. We do not support the MP3 file or any compression format for this reason.***

Instructions for using Extravagant Noise 'Music Bookends'

The Matching Music Kits for 'Music Bookends' are extremely easy to use. The Music Bookends kits have short matching themes to place at the beginning and ending of a non-commercial broadcast production. Normally what is Included in your Music Bookend kit; is a beginning introduction kit piece, and ending kit piece, an optional music piece that creates a longer ending by snapping the kit piece in front of an ending section for longer end credits, and there is also a matching piece to use in the center of your production as well. This kit has a few extras that can be added in other places of your production. More Than Blues Music Bookends is 'Royalty Free'. This means you don't have to pay more money later if you are only using the kit for your videos or podcasts. During license purchase make sure to download your special license. If you have a YouTube Channel please tell us the URL of the channel that is using this kit so that you are good to go!

Please download the entire album for your kit.

These kits are made to be fun. We did all of the hard work ahead of time so that you now have the ability to look very professional in a short amount of time! When music synchronizes to visuals, the music increases the overall quality 100%! Building the best track for your purposes should be fun and rewarding! We want you to look and sound good! Each track is able to meet ATSC A/85 Loudness guidelines; by simply decreasing the volume (called "gain") by -5 dB. Tracks can abut next to each other without artifacts (that annoying crunchy sound). If you'd like the music softer, just use your track fader after you have made your final decisions of track/block placements. We want you to shine above the crowd, and these kits have a polishing affect. Have fun while creating quality!

Below is a list of all of the pieces that you need to downloaded:
